

# Unit **TESTER**<sup>®</sup>

All unit pumps and unit injectors to mention a few: Atego, Axor, Mac, Scania, Deutz, Volvo, Iveco, Volkswagen etc needs to be tested and serviced. Unit Tester is designed to test and diagnose the faults of the unit injector / unit pump systems with least effort in minimum time. Injector/pump mount is simple and quick, yet it is robust and strong to test biggest injectors. Adapters for all types of injectors and unit pumps are available.

**1. Cam Box :** Designed to be mounted on most common test benches. Cam box is completely sealed. Every unit injector / unit pump has its own adapters specially designed. Cam box design helps to service the injector on its horizontal columns and the vertical columns provide precise mounting of the injectors. The test is conducted according to the test plans and the results help to diagnose the fault.
